

Douglas Seo

Does Douglas Seo have the characteristics and potential to be a great Keysight Account Manager?

Berkeley

Electrical Engineering
& Computer Sciences

KEYSIGHT
TECHNOLOGIES

Background

- 1**  **Azetta AI** - Deeply technical theoretical **AI and ML foundational models**. Supported research, and built and demoed GUIs for ICP discovery.
- 2**  **Werk.dance** - VC Backed. **Founding Engineer**. Owned product full stack, **non-technical co-founders**, and led engineering team.
- 3**  **Popper** - Get paid to hang with friends. **CEO Co-Founder**. 2k+ users and business clients to. Growth to SF, with big takeaways.
- 4**  **UC Berkeley EECS** - AI-ML Track. Chi-Psi Fraternity. Deep portfolio of technical projects and foundational understanding of **math, ee, and cs**.
- 5**  Raised in **Corona, CA**. Centennial HS **Salutatorian** 4.83 GPA. FBLA National Runner-Up, Multi-Sport Athlete, Most Likely To Succeed.

Azetta AI

Physics Grounded Neural Networks

- Foundational Model Research Lab based out of San Francisco
 - Pioneering 'Hilbert Models' for Deep Learning
- Supported research credibility projects through published research with ICML (International Committee of Machine Learning), under advisory of Professor Choromanski of Columbia University and Google Deepmind
- Customer discovery through GUI Demonstrations

Relevance: Deep technical understanding of complex topics. Demonstrates the ability to learn highly advanced levels of math and computer science through Artificial Intelligence and Machine Learning.

Werk.dance

The one stop shop for all dance classes

- Slauson & Co \$1.5M raised pre-seed founded by Jessie Ma and David Osorno
 - High status dance celebrity with a deep network in the industry
- First employee and founding engineer.
 - Non-technical founders who needed an internal engineer they can trust and communicate with
 - Led team of 3 contracted engineers and 2 designers
- Established AI Native tech stack and full agentic coding pipelines

Relevance: Communicating technical concepts to non-technical managers was a daily occurrence. Understand the value in conversation

popper.social

Get paid to hang out with friends

- Turned down big tech job to build a startup
 - Convinced three colleagues to be co-founders straight out of college
- Trial by fire learning how to develop web and mobile app in an era before agentic coding tool
 - Led full stack development, infra, and scrum work cycle of 4 engineers
 - Launched to UCR for first 1000 users, 25 paying business clients
- Incubated to San Francisco Founders Inc to scale to 10k downloads, and 60+ paying clients

Relevance: Full ownership of business, sales, customer support, and product.
Strong teamwork to maintain high velocity towards first paying users

Why Keysight?

HP, Agilent, and Keysight was our American Dream

- Witnessed first hand what **36 years** of loyalty and growth alongside Keysight leads to
- Keysight is the **world leaders** in **partnering** with design technology companies across the globe in every industry.
 - **If electricity runs through it, Keysight measures it**
- Amazing culture and highly vetted employees
- It is very exciting that Keysight allows you to learn about **the best technologies of the future** and the opportunities to learn **multi-technology disciplines**.
- Grew up hearing stories of **his father** pioneering **smartphones in South Korea**, haptic touch across the globe, and **meeting the world makers** over lunch.
- Embraces the **torch passed down** by his mentors (Figure 1)

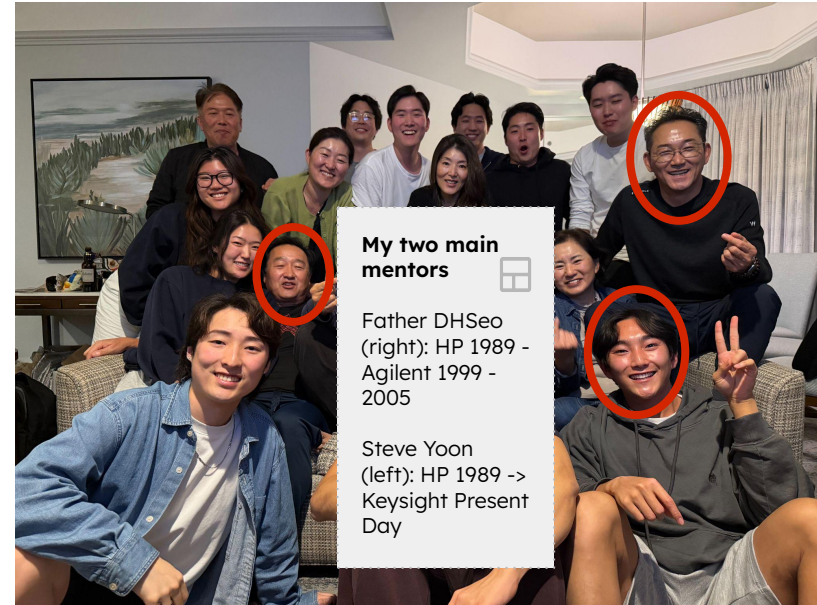

Figure 1

In essence, Douglas was raised by the **community, culture, opportunities, and history** built by HP, Agilent, and **Keysight Technologies**. Now, it's time to create his own legacy standing on the shoulders of the giants before him.

Why Account Manager?

Curiosity for the hardest technical problems

- Highly competitive, **intellectually curious** student and lifelong learner
- **ICML Research** support with **Columbia Deepmind** professor Choromanski at **Azetta AI** demonstrates strong foundation in ability to handling hard technical problems
- Always wants to learn the **frontier of technology**, and now that **software has been relatively solved, hardware is the next frontier**
- Strong academic foundation
 - 36 ACT in STEM, 800 SAT Math, AI/ML Berkeley EECS

To Build Strong Partnerships, and a love for negotiation

- A love for **interacting with people**, and **succeeding** in each interaction
- Embraces any opportunity **to present, and charm** an audience
- **Never shies away from adversity** and **cares deeply about supporting customers**
 - Hunted 500+ user conversions, and 60+ local business door to door sales closed (Figure 2)
 - Farmed 10,000 customers/users supported in 4+ years of startups
- **Keysight** champions **Strength in Partnerships**, and empowers its ACs

As a technologist, and a natural born charmer, he is an **Innate Salesman**, with deep technical curiosity.

Popper launch at UC Berkeley

02. 2025. Douglas Seo, CEO, tables Cal campus to convert users, talk to students, and convert local businesses as he scales his startup to the #1 Public University in the world

Figure 2

Addressing Concerns

A. He only **4 years** out of college **without a traditional sales engineering** track.

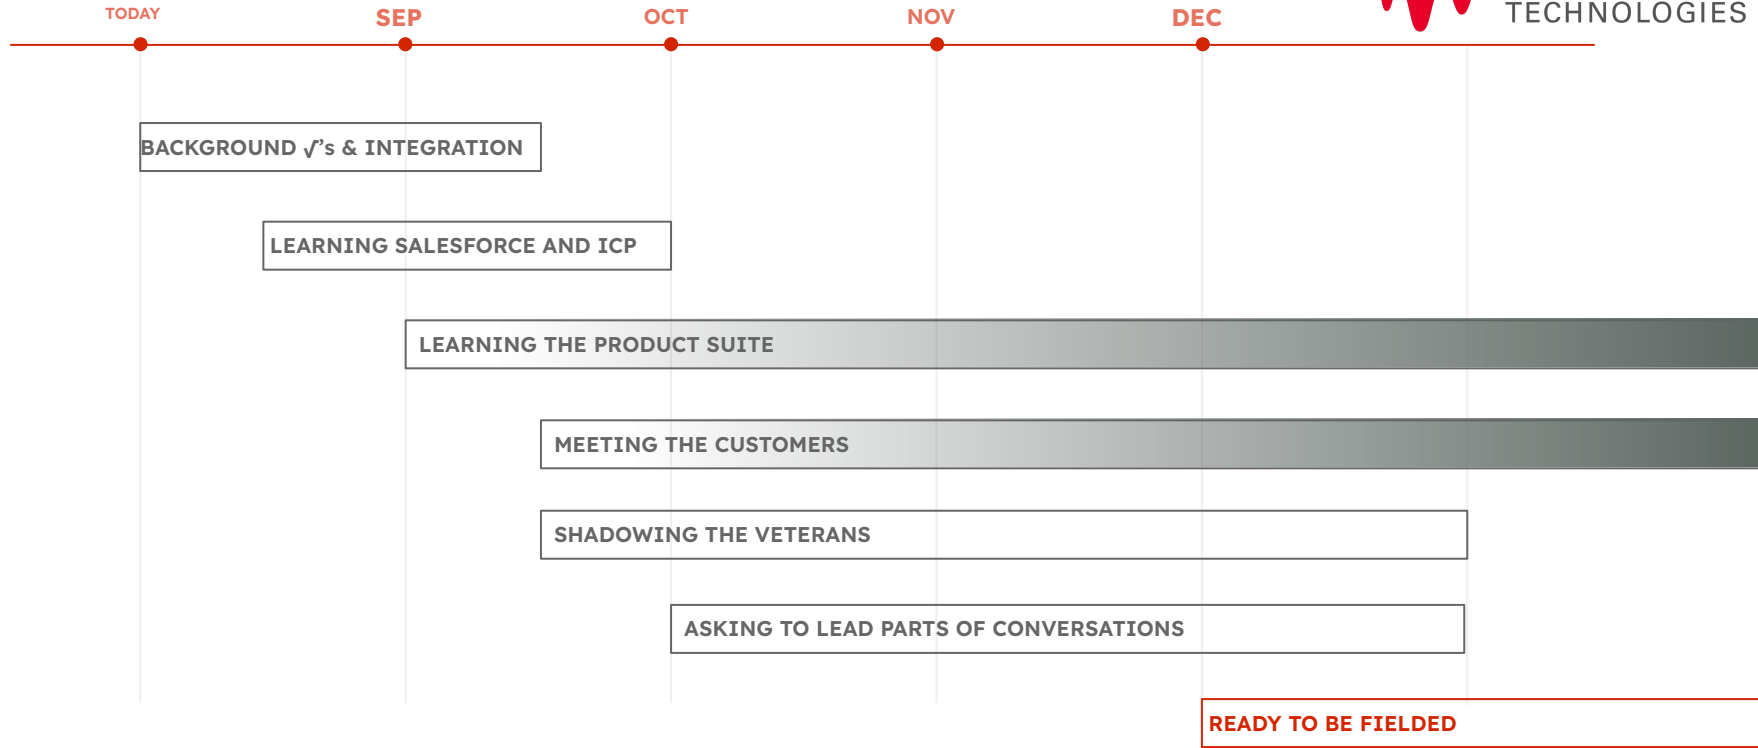

B. His work in startups is impressive, but **not vetted** through a credible system of **performance reviews**, and difficult to contact strong referrals.

C. His **technical depth is limited** to mostly software, without demonstrating much experience in Electrical Engineering.

A Demonstrated **high achievement across STEM** disciplines, and is a **capable student**. He is early enough in his career to be shaped into an ideal **Account Manager**, has **potential for high ROI**.

B Refer to his tenure at VC Backed startup, **werk.dance** for **direct manager referrals**. Otherwise, current Keysight VP **Steve Yoon** is a lifetime mentor that will validate the timeline and milestones of Douglas Seo's career.

C Two hardware based lab classes EE16A and EE16B where Keysight testing hardware were utilized to build **arduino circuit boards**. His internship at Chirp dealt with **microsystems testing devices** for quality assurance on **MEMS sensors**. He understands the **basics of electronics, electromagnetism, and wave technology**.
